DURATION WINDOWS

Supplying high quality aluminium products since 1985

A Revolutionary Idea

Integrated blinds are Venetian style blinds that are actually installed INSIDE the double glazed sealed unit. Our integrated blinds are manufactured to the internal size of the sealed unit, fitting neatly between the two sheets of glass. The slat raising, lowering and tilting function is achieved using a magnetic transmission through the glass, thereby guaranteeing the unit's hermetic seal.

This integrated blind system is very simple and easy to use and functions with surprising grace and speed. Raise, lower and tilt functionality is achieved by simply sliding the push blocks along side border rails.

Features

- Venetian style blinds with high quality 13mm aluminium slats.
- All units are made to measure, and can be installed into new or existing door systems.
- Ease of installation; already installed inside the sealed unit.
- No unsightly cords - clean lines and anti-ligature aspects.
- Operated using magnetic push blocks - raise, lower and tilt functionality.
- Available in a large range of colours and finishes.
- Quick and easy operating with the blinds moving twice the distance that you move the push block - saving time and effort.
- Can be fitted into doors as large as 2.4 metres high and 1 metre wide. (28mm sealed units of up to 2.2 meters high)
- Dust and germ free. Ideal for allergy and asthma sufferers.
- Maintenance free - never need cleaning or dusting.
- There is no need for conventional blinds, nets or curtains, which obscure your window and clutter your window sill.
- Pristine appearance at all times. Protected from physical and wind damage by being encapsulated within the sealed unit.
- Materials used are specifically designed for use inside of sealed units - i.e. they will not "fog" the unit.
- 10 year guarantee.

Available Colours

Not all colours are shown - these are for illustration purposes only.

 White 3201	 Cream 3595	 Brushed Aluminium 167	 Silver 4168
 Stone Grey 7030	 Iron Grey 72	 Light Grey 3513	 Dark Blue 760
 Dark Grey 2025	 Sky Blue 3514	 Brown 3553	 Black 164

A Problem Solved

Having blinds incorporated into your sealed units allows a room to have both privacy and protection from bright sun light without blocking out the natural light or the view. The blades effectively diffuse the light and obscure the vision of prying eyes. If you don't want opaque glass that will constantly impair the clarity of your view, then integrated blinds are for you! The advantage of having your blinds within your sealed units is that they don't require the constant dusting and maintenance associated with conventional blinds.
