Product Design And Development Policy

Here at Duration Windows we believe that continued development and improvement is the key to success. Our ever changing product range is manufactured to the highest standards and is at the forefront of product development and innovation. We reserve the right to change, develop, improve, update, re-design, add to and even discontinue any of the products that we supply and / or manufacture, without prior notification.

Duration Windows is entitled to make changes to our product range as little or often as is necessary to keep our company moving forward. As one of the UK's leading trade manufacturers it is important that we continue to keep moving forward in order to meet the highest possible standards for thermal efficiency, design, durability and security. We support the government's environmental policies and initiatives as the building industry strives for zero carbon building and sustainability.

In order to survive we must keep up with industry standards, building regulations and stay ahead of the competition by continuing to provide our customers with innovative and quality products that our customers have come to expect from the Duration Window Group.

We understand that its hard out there and that's why we aim to provide our customers with innovative products that allow them to differentiate themselves and stand out from the crowd. So that they too can gain a competitive advantage, allowing them to grow and survive within today's difficult and demanding trading conditions.

kind Regards,

Duration Windows
