

# IMPORTANT NOTE FOR ODD LEG WINDOWS

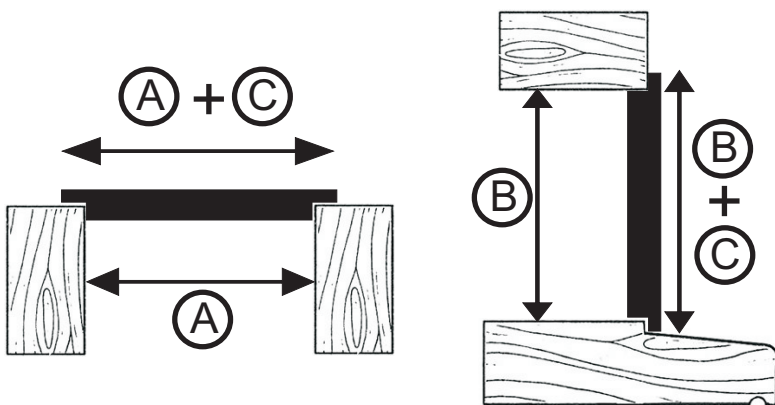

Dear Customer,

Please note that all Duration odd-leg subframe fix aluminium windows are manufactured from a long leg measurement. All order confirmations show long leg measurements, and should be checked and signed off accordingly.

The above shows a typical timber type subframe aluminium window application. To obtain long leg aluminium manufacturing / ordering sizes, the measures A and B are tight inside timber sizes, then please use dimension C from the table.

TO CALCULATE **(C)** USE THIS TABLE

	DURATION & SMARTS	BEAUFORT
Inside timber sizes with lugs	22mm	24mm
Inside timber sizes with holes	28mm	30mm
Short leg sizes	30mm	32mm

Please ensure you double check very carefully before you sign and return your order confirmation so as to avoid timely and costly errors.

Thank You

Information applies to Smarts "Polyamide", Duration "Heritage" and Beaufort "Thermal Break"
