# Dual Rail Magnetic Manual Blinds

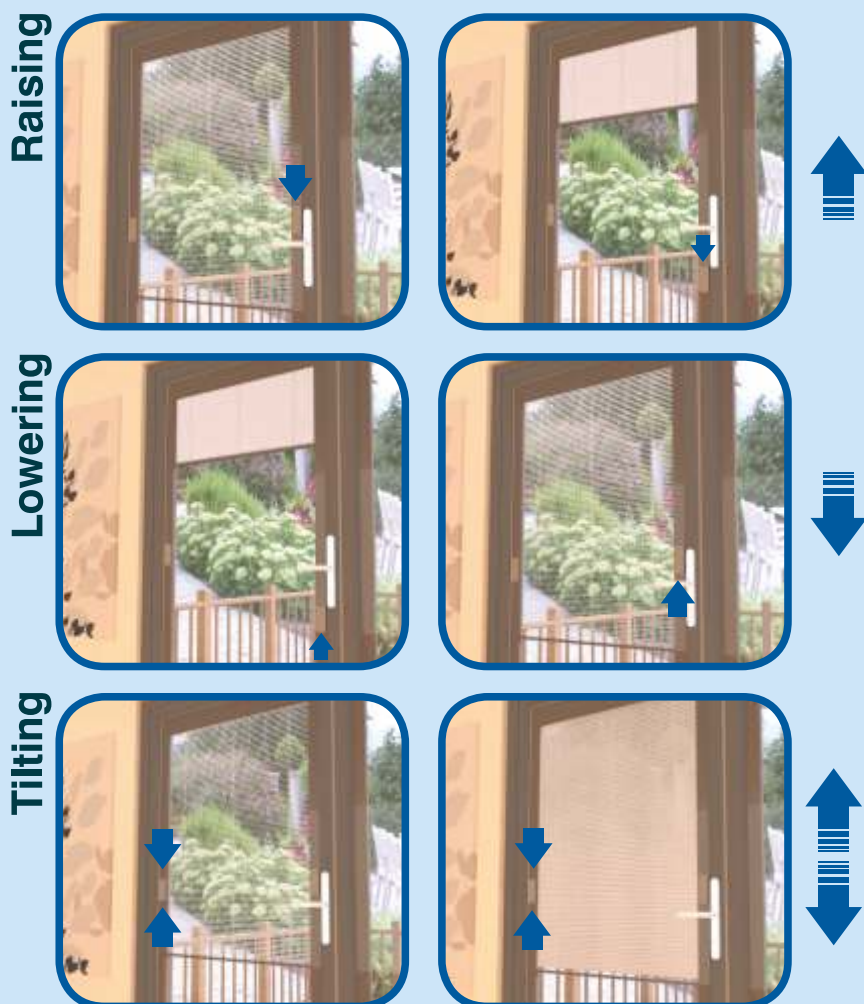

These Venetian style blinds are installed inside the double glazed sealed units, fitting neatly between the two sheets of glass. The slat raising, lowering and tilting function is achieved using a magnetic transmission through the glass, thereby guaranteeing the unit's hermetic seal.

The system is very simple and easy to use and functions with surprising grace and speed. Raise, lower and tilt functionality is achieved by simply sliding the push blocks along the side border rails.

## Key Features

- Venetian style blinds with high quality aluminium slats.
- Ease of installation; already installed inside the sealed units.
- Easy to operate using 2 magnetic sliders for up/down & tilt functions.
- Optimum control of light and heat in rooms.
- Slats are available in a large range of colours.
- Top and guide rails available in a large range of colours.
- Ensures total protection against dirt, dust or weather conditions and therefore do not require any maintenance.
- Designed with safety in mind.

## Blind Operation

## Colours

### Slats

### Rails

All rails are painted in a complimentary colour to the slats.

Alternately you can chose a different colour slat to the rail colour.  
eg. Silver slat with a dark grey rail

# Battery Controller

## Electronic Blinds

Our integrated Venetian style blinds fit neatly inside the double glazed sealed units keeping them dust and maintenance free. They are battery operated using the actuator provided with no electrician needed. The actuators are re-chargeable using the charger provided and operate the blinds with raising, lowering and tilting functions.

There are two options available with these blinds:

- **Manual control** - One actuator which will operate one blind at a time. The actuator must be moved from unit to unit to operate each blind separately.
- **Remote control** - An actuator for each panel and a separate hand held remote to operate the blind units individually or as a group.

### Key Features

- Venetian style blinds with high quality aluminium slats.
- Ease of installation; already installed inside the sealed units.
- Easy to operate using rechargeable battery powered actuators.
- Optimum control of light and heat in rooms.
- Slats are available in a range of 6 colours.
- Ensures total protection against dirt, dust or weather conditions and therefore do not require any maintenance.
- Designed with safety in mind with no cords.

### Blind Operation

**Raising**

push 'up' button

**Lowering**

push 'down' button

**Tilting**

hold 'up' or 'down' button to rotate slats

The diagram illustrates three functions of the blinds. For 'Raising', a hand presses the 'up' button on the actuator, and the blind is shown moving upwards. For 'Lowering', a hand presses the 'down' button, and the blind moves downwards. For 'Tilting', a hand holds either the 'up' or 'down' button, and the slats are shown rotating. Each function is accompanied by a corresponding window view showing the blind's position and a directional arrow.

Remote & Actuators

### Colours Slats

 002 White	 029 Beige	 028 Cream
 048 Light Grey	 056 Mid Grey	 050 Silver
 045 Dark Grey		

### Actuators

			
White	Silver	Grey	Black

Hand held remote available in white only.
