

Duraslide 2000

Aluminium Patio Doors

DURATION
WINDOWS

Slim, Stylish & *Elegant* **Duraslide 2000**

The Duraslide 2000 features slim-line profiles, minimal sight lines and features the latest 'Polyamide' thermal break technology, providing consumers with both enhanced thermal performance and the option of dual colour profiles* in a wide choice of colour finishes.

The doors feature double glazed sealed units that are secured using a wrap-around glazing system resulting in slimmer more secure panels. They are also fitted with a multi-point locking system with stainless steel one piece keep for enhanced security. With its security, looks and overall thermal efficiency, the Duraslide 2000 is suitable for residential applications; both new build and refurbishment projects, and can be fitted into a timber subframe or directly to brick.

The Duraslide 2000 is highly versatile and offers a choice of double or triple track configurations, a standard or heavy duty interlock and all panels on this door can slide giving more flexibility.

*Dual colour only available on two track designs.

We reserve the right to make changes to the product specification as technical developments dictate, and without prior notice. Pictures shown are for illustrative purposes and are not binding in detail, colour or specification.

E. & O.E.
