The Duraslide 2000 features slim-line profiles, minimal sight lines and features the latest ‘Polyamide’ thermal break technology, providing consumers with both enhanced thermal performance and the option of dual colour profiles* in a wide choice of colour finishes.

The doors feature double glazed sealed units that are secured using a wrap-around glazing system resulting in slimmer more secure panels. They are also fitted with a multi-point locking system with stainless steel one piece keep for enhanced security. With its security, looks and overall thermal efficiency, the Duraslide 2000 is suitable for residential applications; both new build and refurbishment projects, and can be fitted into a timber subframe or directly to brick.

The Duraslide 2000 is highly versatile and offers a choice of double or triple track configurations, a standard or heavy duty interlock and all panels on this door can slide giving more flexibility.

*Dual colour only available on two track designs.
Key Features

- All panels can slide offering greater flexibility.
- Over 200 single or dual colours available.*
- Also available in a range of textured colours.
- ‘Polyamide’ thermally broken profiles for superior efficiency.
