

Internal Screens (ACINT311)

Order Sizes - Width & Height

THIS ADVICE PERTAINS TO INTERNAL SLIDING DOORS USING ACINT311 FIXING BRACKET

Order Size - WIDTH

Please supply the aperture width.

We will add 10mm to each side of your width to ensure the sliding panel overlaps the aperture.

For example, your aperture is 800mm wide.

We will add 10mm to both sides to ensure coverage.

$800 + 10 + 10 = 820\text{mm}$ (our manufacturing size)

Order Size - HEIGHT

We treat your supplied height as the total height.

This includes 40mm Bracket, 35mm Top Rail and 4mm gap to top and a 4mm gap at bottom.

We do not make any additions or subtractions to it.
